# **AIFORIA TECHNOLOGIES INC**

Mr. Jukka Tapaninen CEO jukka.tapaninen@aiforia.com +33 610 416 686 www.aiforia.com

Aiforia equips pathologists and scientists in preclinical and clinical labs with powerful deep learning artificial intelligence software for translating images into discoveries, decisions, and diagnoses.

The cloud based Aiforia products and services aim to escalate the efficiency and precision of medical image analysis beyond current capabilities, across a variety of fields from oncology to neuroscience and more.

# **BC PLATFORMS**

Mr. Juho Evasoja Life Sciences Sales Director RWD and Genomics juho.evasoja@bcplatforms.com +358 40 7302 313 www.bcplatforms.com

BC Platforms is a global leader in providing a powerful data and technology platform for personalized medicine and drug development, accelerating the translation of insights into clinical practice.

BC Platforms operates the Global Data Partner Network BCRQUEST.com, which provides access and analytics on genomic and clinical cohort data for drug developers, currently providing access to over 33+ M subjects across five continents.

Our technology drives the infinite loop between personalized care and research discoveries, leveraging latest science, deep technical expertise, strategic partnerships, and harmonized, diverse data collections.

Our high performing platforms enable high throughput genomic data production, flexible data integration, secure data management, efficient analysis and interpretation of molecular and clinical information.

Founded in 1997 from an MIT Whitehead project spinoff, the Company has a strong scientific heritage underpinned by over 20 years of working in close collaboration with a network of leading researchers, developers, manufacturers and vendors. BC Platforms has global operations with its headquarters in Zurich, Switzerland, research and development in Espoo, Finland, and presence in London, Boston and Singapore.

Ms. Anni Iso-Mustajärvi Head of Saas business anni.iso-mustajarvi@beehealthy.com +358 50 527 9263 www.beehealthy.com

BeeHealthy is the leader in developing digital healthcare solutions in the European market. The module based, white-label, software as a service (SaaS) platform supports primary and secondary care healthcare providers to take the digital leap by digitising their patient journeys.

With BeeHealthy platform you can open up your own Digital Clinic, make online bookings and digitise patient journeys. Best of all, you can offer your patients 24/7 access to personalised, streamlined and comprehensive mobile health services remotely, fast, cost efficiently and with outstanding customer experience.

We are passionate in taking this leap together – from one health care professional to another. Because that's the smartest thing to do.

# **BUDDY HEALTHCARE LTD OY**

Mr. Jussi Määttä CEO jussi@buddyhealthcare.com +358405522151 www.buddyhealthcare.com

Buddy Healthcare - time to care.

We've been at the forefront of implementing progressive digital care pathways, such as perioperative pathways in Europe since we were established in 2016. aWe're transforming the way they work and the way they communicate, automating manual and resource-heavy care coordination processes that have been largely untouched for years.

We're doing it by implementing the best possible digitised care pathways, forming an effortless communication link between home and hospital. And that means maximising every single interaction.

It's why we're recognised as the global technology healthcare partner of choice, enabling providers to deliver outstanding care and experience for their patients, and facilitating efficiencies within clinical environments.

Ms. Anna Starynska CEO anna.starynska@cardiolyse.me +358 41 8005 007 www.cardiolyse.com

Cardiolyse provides a fully CE-marked patient monitoring platform for primary and secondary prevention. Targeting early screening (prevention) of general populations and post-discharge journey support for chronic cardiovascular disease (CVD) patients.

The platform uses automated ECG & HRV analytics to enable risk stratification, remote vital signs monitoring, and personalized patient reports for early diagnostics and better care. The platform's risk-stratification and decision-support scoring system can be used across various patient groups, such as Heart Failure, Atrial Fibrillation, Diabetes, etc.

Cardiolyse standard ECG analysis, Myocardial damage, and a patented Universal ECG Score System provide a quantitative assessment of a patient's condition and the effectiveness of therapeutic measures with a proven predictive value in relation to the outcome of a number of diseases.

# **CITYNOMADI**

Ms. Merja Taipaleenmäki CEO merja@citynomadi.com +358 40 4840 178 www.citynomadi.com

We create the quality passage ways for the more efficient, greener, safer and friendlier environment to help to make the better operating hospitals: no lost doctors' appointments, net zero for the hospital and its stakeholders.

Citynomadi's concept is running in a number of Finnish hospitals for the optimal and clear customer experience in the first place. The service's carbon handprint will reduce the turn time of the delivery, maintenance and other stakeholders at site. The fourth benefit is the exclusive data harvesting for the future planning.

#### **DBC GLOBAL LTD**

Mr. Esa Parjanen CEO esa.parjanen@dbc.fi +358 44 2086 801 www.apptivehealth.com

With DBC people can detect the risk category of the problems early on and get the functional treatment they need. Avoid surgery and live a full life with a fraction of the cost of traditional surgical treatment. Our method is based upon decades and hundreds of research and clinical studies proven to help 90% of patients suffering with MSK problems.

The Healthcare industry demands measurable outcomes. DBC method is inline with the Value Based Healthcare definitions and KPI's. The old paradigms of care are shifting from the current passive treatment (bedrest, painkillers and surgery) to evidence based active treatment. DBC's own quality assurance database is on par with the scientific studies, resolving 93% of the MSK problems and generating up to 49% savings in direct healthcare costs.

#### **EUFORMATICS**

Dr. Christophe Roos CSO christophe.roos@euformatics.com +358 50 5326 029 www.euformatics.com

The Euformatics Genomics Hub consists of the omnomics family of software products that address NGS gene test workflow validation, data quality control, genome coverage analysis, and variant annotation, interpretation, classification, and reporting. The software products build on enterprise level IT solutions and databases ranging from small to very large and are used in clinical genetics and molecular pathology.

The architecture enables flexible adaptation and integration into larger clinical research or healthcare systems. The robustness of the omnomicsQ quality control management software provides the highest confidence in results that a molecular genetics diagnostic laboratory can deliver. Euformatics is technology driven and aims at further widening the scope of its partnerships.

# **FEPOD OY LTD**

Mr. Jussi Pyysalo Founder & CEO jussi@fepod.com +358 40 0789 328 www.fepod.com

Fepod Oy Ltd is commercialising cutting edge technology that enables measuring the real blood concentration of pain medicine directly from a drop of blood at the point-of-care.

We provide a fast, simple and relatively painless sampling process with quick test results, using a mobile phone, portable potentiostat and mass-producible & disposable sampling sensors. The process involves collecting a blood sample with patented sensor, which is then inserted into a portable potentiostat connected to a mobile phone. The results of the sample are available almost immediately and transferred securely to Fepod's servers for analysis. Fepod's servers leverage powerful machine learning technology to process the results and return the analysis to the user.

Ms. Anissa Margono International Sales Manager anissa.margono@hublet.fi +358 40 5047 049 www.gethublet.com

Hublet is a Finnish company that has innovative self- service tablet loaning solution for Hospitals and Senior Care Homes, that offers a safe, simple and user-friendly loaning system of tablets. Hublet is the perfect solution for offering your patients and staff a simple way to interact with digital services such as patient management and welfare systems, entertainment and TV, communication with loved ones, learning and information access.

Hublet Manager is an efficient solution to give full control over all relevant settings, personal data and security levels for the users, to offer digital content and apps that also are updated automatically. This provides robust data security, allowing you always to comply with GDPR and removing any need for time consuming staff intervention before the next device loan. You can also share news and information in the news carousel with timed posts.

Here are some of the highlights we offer:

- 1. Security The Tablets are locked and only usable in a pre selected WiFi network. They are loanable via user authentication such as an Identity card or a patient wrist band.
- 2. Content you decide the profiles and content on the Tablets. E.g you can have different content and profiles for staff, patients, customer, and departments.
- 3. GDPR/data security Every time the Tablet is returned to the dock or the loan is completed, all user data and history is cleared, and charging begins automatically.
- 4. Automation Software, Apps and Profiles are automatically updated, no staff interaction needed.

# **INJEQ PLC**

Ms. Maarit Forstén Clinical Application Manager maarit.forsten@injeq.com +358 50 5432 912 www.injeq.com

Injeq company is a manufacturer on a mission to transform previously passive needles to sensing-enabled high-value medical devices that help performing demanding punctures safely and efficiently. Our first innovative application, Injeq IQ-Tip® system provides real-time detection of cerebrospinal fluid (CSF) and can increase the safety and first puncture success of the most critical lumbar punctures. In our clinical studies Injeq IQ-Tip® system has shown a remarkable reduction in the incidence of the most common complications of lumbar punctures like post dural puncture headaches (PDPH) and traumatic lumbar punctures.

Injeq company was founded by an innovative team of clinicians and engineers over 10 years ago. Thanks to their interdisciplinary backgrounds, they knew that various tissues conduct electricity in slightly different ways and this information could facilitate performing blind lumbar punctures. The electrical conductivity of tissues is continuously analysed with Injeq IQ-Tip® analyser and when Injeq IQ-Tip® spinal needle tip reaches CSF, the system alerts the physician with an audio-visual signal.

Injeq IQ-Tip® System is CE approved by Notified Body TÜV SÜD (0123) and European market entry started in accordance with MDR in December 2021.

# **ORCASON MEDICAL OY**

Mr. Elias Revonta Founder, Sr. Partner elias.revonta@orcason.com +358 40 1686 766 www.orcason.com

Orcason Medical produces modern, easy-to-use and affordable diagnostic devices for healthcare practitioners in any country and setting to practice better medicine with rapid and reliable results.

Our passion is to solve the global problem of inadequately informed sinusitis diagnoses - thus reducing unnecessary antibiotic usage dramatically.

Echo - our handheld ultrasound device, is specifically designed for detecting and ruling out sinusitis. Echo is the right diagnostic tool for all healthcare practitioners at the first point of contact when suspecting sinusitis.

We are interested in forming partnerships with entities that want to join us in our mission to stop the growth of antibiotic resistant bacteria by reducing the use of unnecessary antibiotics through better and more informative care.

# OY RAISOFT LTD

Mr. Vincent Gleviczky
Account manager
vincent.gleviczky@raisoft.com
+358 40 6783 538
www.raisoft.com/fr/page-daccueil/

#### **OUR SOLUTION**

Our solution - RAIsoft.net - is a SaaS software solution, providing assessment tools in the area of elderly care, mental health care, disability care and preventive care. Our solution is available in several languages. The assessment tools are based on the interRAI philosophy, developed by a collaborative network of researchers and practitioners in over 35 countries.

#### **BENEFITS & REFERENCES**

From the first initial contact all the way to palliative care, we are a part of every stage of the care planning process, also providing a care planning module based on the outcomes of the assessments. Our tools give care professionals and administrators access to real-time information, making the solution truly effective. Providing the right information at the right time saves both time and money.

The data collected is analyzed through our algorithms and modules. Several indicators are available at the patient level (such as health indicators), the clinician and the management (such as quality of care indicators). Built-in classifications can be used by insurance companies to calculate reimbursement and financial help for the patient. This is already being used in Switzerland, Belgium, Canada and Finland.

#### **COMPANY**

Raisoft Ltd, founded in 2000, is a privately held company with 60+ employees from 12 countries. Raisoft is internationally certified by the ISO 9001 quality system and for data security by ISO/IEC 27001. We are the market leader in Finland and Switzerland and our software solution is 15 used in 12+ countries all over the world.

Mr. Aki Kuivalainen CEO aki.kuivalainen@predicell.com +358 40 7212 323 www.predicell.com

# Predicell

Predicell Oy, founded 2019 in Finland owned by its founders, works for better healthcare & welfare services by ecosystems, data platform, analytics and care path design.

Predicell combines data into one user experience for care professionals by integrating the platform with and to data providers assets. Built-in care path design module secures each individual care path designed personalized way in data driven manner. Predicell's approach is holistic and technologically agnostic which supports several care and rehabilitation paths to achieve its goals.

# **PULSEON OY**

Mr. Jaakko Hattula CTO jaakko.hattula@pulseon.com +358 40 8036 771 www.pulseon.com

PulseOn, a pioneer in optical heart rate (OHR) technology, is a high tech company specialized in arrhythmia detection devices and analysis software for professional medical use. PulseOn's complete and connected end-to-end solution is based on unique expertise gained through vast research and development trying to solve the problem of the complexity to detect and monitor arrhythmias.

PulseOn solution is changing the future with an easy to use solution driving significant improvements in hospital – and in Doctor time Efficiency.

## **TIETOEVRY HEALTH**

Ms. Malin Soderlund Head of Business Development malin.a.soderlund@tietoevry.com +46 725 753 380 www.tietoevry.com

Tietoevry Care is modernizing the Nordic health and social care sector with modular, open, and interoperable software. We put citizens and patients at the center, simplifying everyday life for all, and providing the tools required to transition towards increased self-and preventive care and lower cost-of-care settings.

Our solutions are designed for people, creating world-class user experiences, enabling collaboration between health & care professionals, citizens, patients and colleagues, and enhancing the quality of work and job satisfaction. We make health and care more efficient, consistent, and accurate by streamlining care pathways with process support, automation and data-driven and AI-assisted tools.

Tietoevry Care is driving digitalization and innovation, making it easy for our customers and partners to develop new applications and reduce complexity. We do this by providing a stable and secure option of SaaS-based delivery in a hybrid-cloud context, coupled with managed services.

# **TEAM FINLAND**

The Team Finland network promotes internationalization of Finnish businesses, Finland's external economic relations, brand abroad, travel and investments to Finland. The network brings key authorities and organizations under one umbrella, improves the efficiency of their cooperation, and provides customers with an easy access to a wide range of services.

The Team Finland network consists of more than 80 local teams around the world. It also brings together Finnish authorities, publicly funded organizations and other key parties with ties to Finland. A network of regional coordinators serve customers at the national level. The core members of the Team Finland network are Business Finland, the Ministry for Foreign Affairs, Finnvera, and Centre for Economic Development, Transport and the Environment.

# Official Delegation:

Ms. Päivi Sillanaukee Ambassador for Health and Wellbeing, Ministry for Foreign Affairs

**Mr. Matti Anttonen**Ambassador of Finland to France

**Ms. Henriikka Yliheljo**Commercial Counsellor, Embassy of Finland

firstname.lastname@formin.fi

# **BUSINESS FINLAND**

Business Finland is the Finnish innovation funding, trade, investment, and travel promotion organization, headquartered in Helsinki.

Our foremost goal is to offer a smooth service path for our customers in Finland when they need innovation funding and advise in growing internationally and our international customers when they are investing in Finland or visiting Finland. Our strategy is twofold: enabling global growth for companies and creating world-class business ecosystems and competitive business environment for Finland that international companies can also participate in.

Business Finland is fully owned by the Finnish Government employing some 600 experts in 40 offices globally and in 20 regional offices around Finland. Business Finland is part of the Team Finland network.
